### CONNECT WITH ME:

Looking to rescue a stalled project, align global stakeholders, or bring structure to high-impact, high-pressure initiatives?

Need to deliver complex engineering programs, drive innovation to market, or embed sustainable project management practices across your organisation?

Contact Harry van den Oord for expert support in program recovery, cross-functional delivery, and transformation leadership. With a proven track record across industry leaders like Porsche, BASF, and Philips, Harry brings the clarity, resilience, and hands-on execution needed to turn complexity into results.

MEETS URGENCY – TURNING  
CHALLENGES INTO STRUCTURED,  
ACTIONABLE OUTCOMES."**

### INTRODUCTION

Harry van den Oord is a seasoned Transformation and Program Delivery Leader, specialising in complex engineering initiatives, cross-border stakeholder alignment, and recovery of high-stakes projects across automotive, high-tech, and manufacturing sectors. A driver of operational turnaround, he has led mission-critical programs for industry leaders including Porsche, Audi, BASF, and Philips, with deep expertise in NPI, compliance, and legal frameworks such as patents, NDAs, and regulatory certifications.

Harry excels at restoring structure—resolving escalations, aligning global teams, and embedding processes that drive delivery, quality, and strategic impact. He brings a rare combination of hands-on engineering expertise and executive-level program leadership, empowering organisations to stabilise, accelerate, and succeed. With a career spanning innovation, industrialisation, and transformation, Harry is a trusted partner for businesses navigating complexity and scale.

### HOW I CAN HELP YOUR BUSINESS

- **Complex Program Recovery & Delivery** – Restores momentum in high-stakes projects through structure, leadership, and hands-on execution.
- **New Product Introduction & Engineering Excellence** – Leads end-to-end innovation programs from concept to market across high-tech and automotive sectors.
- **Stakeholder Alignment & Risk Mitigation** – Resolves conflict, anticipates roadblocks, and unites global teams around shared outcomes.
- **Process Design & Operational Turnaround** – Implements custom methodologies, tools, and workflows that boost delivery speed and reliability.
